

MOHIT KUMAR

mohitkumarmnitj@gmail.com | [LinkedIn](#) | [GitHub](#) | [PortFolio](#) | New Delhi, India

Professional Summary

Backend Software Engineer with 1.5 years of experience building scalable, distributed cloud systems. Proficient in Python, Django, and REST APIs. Experienced in relational database design, asynchronous workflows, and microservices architecture. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, and System Design.

Experience

E2E Networks Ltd.

Jul 2025 – May 2026

Associate Software Engineer

New Delhi, India

- Improved E2E's managed Continuous Data Protection (CDP) services based on R1Soft Backup Manager, overhauling the legacy codebase, reducing backup failure rates by 80%.
- Engineered backup archival and recovery pipelines using **MinIO** and **R1Soft SOAP APIs**, enabling custom S3/MinIO storage integrations and configurable retention policies. Implemented fault-tolerant file-level and bare-metal VM restores for 500+ enterprise clients.
- Added AES-256 encryption support in CDP backups and resolved delayed status synchronization by using asynchronous **Celery** pollers and cron-based reconciliation jobs, driving a 30% increase in process reliability.
- Worked on Audit Logging and Activity Timeline across services (Compute, VPC, DBaaS, Load Balancers, Kubernetes, Autoscaling), surfacing comprehensive event metadata to show customers a chronological history of all actions performed on their resources.
- Refactored the Zabbix monitoring codebase to add Chennai Region support and resolved false alert anomalies caused by stale hosts, resulting in a 40% reduction in manual ops team support tickets.
- Launched monthly installment billing feature for postpaid customers with committed plans, allowing flexible payments over upfront costs. Successfully generated estimates and invoices for over 2,000 resources and used by 100+ customers.

E2E Networks Ltd.

Jan 2025 – Jun 2025

Software Engineering Intern — Certificate

New Delhi, India

- Created an internal Django Admin feature utilizing asynchronous migration scripts to automate transferring of cloud resources between customer accounts, streamlining operations workflows.
- Owned the root email change feature, debugging production edge-cases and resolving post-modification resource failures, driving a 90% reduction in Zoho support tickets and improving overall reliability.
- Integrated **Zoho APIs** to deploy a Security Operations Center (SOC) module, automating the detection, ticketing, and mitigation of 50+ malicious VMs per month.
- Streamlined IT support operations by engineering Zoho webhooks and Django REST APIs to automate real-time ticket synchronization between Zoho Desk and the customer dashboard.

Education

Malaviya National Institute of Technology (NIT Jaipur)

2021 – 2025

B.Tech in Computer Science and Engineering

CGPA: 7.75

Projects

Online Code Compiler & Judge — [GitHub Link](#)

Sep 2025

- Architected an Online Judge System to automate the process of evaluating and compiling programming problems that allows users to register and log in to solve coding problems.
- Implemented compiler logic using child process modules, returning real-time verdicts; supporting C, C++ and Python.
- Built RESTful API endpoints with JWT token validation, enabling secure authentication, user administration, and added 50+ programming problems.
- Tech Stack: Angular for UI, Django for Backend, MySQL, AWS for Deployment, Docker for Containerization.

Technical Skills

Programming Languages: Python, C, C++, JavaScript, TypeScript, SQL

Backend & Web Technologies: Django, Django REST Framework (DRF), RESTful APIs, Celery, Microservices, Nginx, Unicorn, React, Next.js, Angular, HTML/CSS, Tailwind CSS

Databases & Messaging: MySQL, MariaDB, MongoDB, Redis, Memcached, RabbitMQ

Cloud, Infrastructure & Tools: AWS, Docker, Kubernetes, Linux, MinIO, OpenNebula, Zabbix, Git, GitHub, VS Code, Postman, Claude Code, Copilot

Computer Science Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, System Design, Distributed Systems, DBMS, Operating Systems, Computer Networks

Achievements

- Solved 1,000+ Data Structures and Algorithms problems across [LeetCode](#), [GeeksforGeeks](#), and [InterviewBit](#).
- Achieved 99.15 percentile in JEE Mains 2021 examination among 1 million+ candidates.
